**Information About Your Drinking Water**

*Monitoring requirements for  
Oakdale School, PWSID#OK8005518,  
were not met for June 2009 – September 2009*

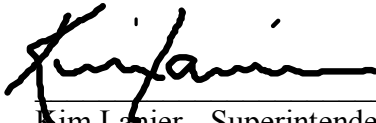

We are required to monitor your drinking water for specific contaminants on a regular basis. The Oakdale School water system was not monitored (5 samples) for Tap Water Lead and Copper at approved sample sites as required on a triennial basis during June - September 2009. Even though this was not an emergency you have the right to know what happened and what we did to correct the situation.

To ensure future compliance we are using multiple calendars; collector, building and grounds director, and superintendent; for reminders of sampling dates. We are now in the process of fulfilling the sampling requirements.

There is nothing you need to do at this time except share this information with others who may drink this water.

For more information contact Warren Lanier at 771-3373.

This noticed is being posted on the entry doors to the superintendent's office and on the school web page as an effort to be consistent with open meeting act requirements.
